

# Custom Banners

At HyLyte, we can digitally print your banner or use self-adhesive vinyl to create your masterpiece!

All we need is your imagination and our creative team will produce to your specifications exactly what you are after. From a product launch to a fete, we can do large banners and small.

We have many options in materials, from high grade banner materials that last for years to corflute for temporary banners, or polyester fabric for a lighter indoor option.

We can also edit banners - if you just require a date change or a small amendment, or a complete restructure just bring in your old banner and let us re-vamp it for you! Call us now !
