

## Beacons, Lightbars and Work Lights

### Mag70

This Magnetic Based Beacon is available with rotator/ double flasher or quad flasher, and is road safe to a max 112KM/H when attached to a clean, dry, non porous, ferrous and flat surface.

Also available in a 3 bolt system and a pole mounted system for different applications.

Proven dual Voltage belt driven powerful beacon which incorporates whisper-quiet rotators.

This beacon is dual voltage, 12V and 24V.

### Rotating LED Beacon

These Beacons offer exceptional light output. With its unique design and low current draw plus with the bonus of the LED lighting, giving them an extended life.

### Blaze LightBars

We offer these lightbars in rotator or quad flasher either in a 2 bolt or with a Magnetic base. These lightbars offer high visibility where needed. The Lightbar has the lowest profile and is one of the most advanced small lightbars available.

### Evolution LightBars

The Evolution is a low profile lightbar, measuring only 108mm from the aluminum base to the polycarbonate lens. With optional strobes, alley lights, illuminated signage, these lightbars are very versatile.

### Work Lights

These High Intensity Discharge lights, known as Gas Discharge are a reduced heat and longer life Light. One 35W GDL produces as much luminous flux as two 100W halogen for only 1/3 the power use. Many options available, ask us now!
